NEW YORK CITY ENERGY TASK
SUSTAINABLE NEW YORK 2006, DESIGN TRUST FOR PUBLIC SPACE

2007

APRIL 11: New York Mayor Michael Bloomberg Tuesday released the first comprehensive inventory of greenhouse gas emissions in New York City's history and announced that New York will host mayors from large cities around the world at a C40 Large Cities Climate Summit in May.

APRIL 23: New York Mayor Michael Bloomberg Sunday presented a plan to cope with climate change and a fast-growing population in a sweeping policy speech containing 127 separate initiatives. PlaNYC: A Greener, Greater New York, has been in the works since December but the mayor chose to issue it on Earth Day to underline his goal of making America's largest city also the greenest by 2030. Covering land, air, water, energy, and transportation, PlaNYC is the result of thousands of hours of work, informed by public meetings and feedback from New Yorkers. It establishes goals that include reducing greenhouse gas emissions by 30 percent by 2030, although the mayor says even that goal is not set high enough.
